

National Certificate in Occupational Health and Safety (Workplace Safety) (Level 3)

Level 3

Credits 50

Purpose

This qualification is designed to accommodate the needs of a wide cross section of industry personnel. The qualification provides evidence of the attainment of an intermediate level of workplace health and safety knowledge as well as recognising competencies associated with a range of workplace safety and health issues from specific industries.

This qualification has been designed to enable it to be used by a number of different industries. The compulsory section covers the common health and safety skills and knowledge required by all industries whereas the elective sections enable different industries to choose the standards, domains, or subfields that suit their requirements.

Candidates completing this qualification would be able to progress to the National Certificate in Occupational Health and Safety (Co-ordination) (Level 4) [Ref: 0944] if they wished to become occupational safety facilitators. This in turn could lead to further qualifications at diploma or degree level.

Requirements for Award of Qualification

Award of NQF Qualifications

Credit gained for a standard may be used only once to meet the requirements of this qualification.

Unit standards and achievement standards that are equivalent in outcome are mutually exclusive for the purpose of award. The table of mutually exclusive standards is provided in section 7 of the New Zealand Qualifications Authority (NZQA) Rules and Procedures publications available at <http://www.nzqa.govt.nz/ncea/acrp/index.html>.

Reviewed standards that continue to recognise the same overall outcome are registered as new versions and retain their identification number (ID). Any version of a standard with the same ID may be used to meet qualification requirements that list the ID and/or that specify the past or current classification of the standard.

Version 5 was issued following review.

Changes to structure and content

- Credit total has decreased from 52 to 50.
- Standards 22316, 22317 and 22318 have been specified for Elective A.
- The *Communication Skills* subfield has been removed from, and the *Law and Security* and *Planning and Construction* fields have been added to, Elective B.
- Subfields and domains for all the fields in Elective B are no longer specified.

For detailed information see [Review Summaries](#) on the NZQA website.

People part way through version 4 of this qualification may choose to complete that version or transfer to version 5.

Previous versions of the qualifications

Version 4 was issued following a revision. Changes to this qualification have resulted from the addition of the *Sea Survival* and *Sea Safety* domains to Elective B, amendments to standard 497 and an increase in credit total.

Version 3 was issued following a revision. Changes to this qualification have resulted from the need to broaden the qualification to include access for road transport, engineering, food processing and petrochemical pipeline work.

Changes to structure and content included standard 17601 removed from the compulsory section; standards 167, 168, 1277, 1299, 3268, 3270, 3272, 3501, 9677, 9680, 9707, 15275, 16718, and 18496 were no longer listed as separate items in Elective A, however, they were included within their subfield or domain in the expanded Elective B; the domain *Workplace Fire and Emergency Response*, and standards 6400, 6401, 6402, 10851, and 10852 were moved from Elective A to Elective B; elective B was expanded to include a wide range of subfields and domains; and minimum overall credits decreased from 55 to 50.

Version 2 of this qualification was issued following the review of standards 10851, 10852, 16670, and 16671; and the *Forestry* subfield was added to the elective section.

Quality Management Systems

Providers and Industry Training Organisations must be accredited by a recognised Quality Assurance Body before they can register credits from assessment against standards. Accredited providers and Industry Training Organisations assessing against standards must engage with the moderation system that applies to those standards. Accreditation requirements and the moderation system are outlined in the associated Accreditation and Moderation Action Plan (AMAP) for each standard.
